

# GROW SCHEDULE

The latest advancement in plant nutrition technology

This exclusive concentrated line of powdered fertilisers has been meticulously designed for the sophisticated high yield grower who demands excellence and innovation in every aspect of their cultivation. Each product in the Rhodos line is designed for simplicity and efficiency, providing a straightforward approach to plant nutrition without compromising on performance.

The figures in the schedule represent the amount of milliliters/ grams of a product that should be added to **100 L of water** in the corresponding phase.

Dissolve in order	↓	Clone	Vegetative	Bloom	Flush
Gen200 Control		15 ml	15 ml	15 ml	-
Rhodos Base		66 gr	100 gr	100 gr	-
Rhodos Grow		-	190 gr	-	-
Rhodos Bloom		100 gr	-	190 gr	-
<b>EC</b>		<b>2.0</b>	<b>3.0</b>	<b>3.0</b>	<b>&lt;0.1</b>
pH hydroponics, aeroponics, and Coco-based setups.		5.8	5.5-5.8	5.8-6.2	6.0-6.4
pH Soil		5.8	5.9-6.2	6.0-6.4	6.0-6.4

*Rhodos is formulated for use in all types of growing systems, including hydroponics, aeroponics, and soil/ Coco-based setups.*

 **Rhodos**

# GROW SCHEDULE

Application instruction steps Rhodos

**START WATER QUALITY** Starting with clean water, preferred to start with osmosis water.

If using tap water, ensure the starting EC is below 0.4 mS/cm.

## INITIAL MIXING

**Step 1.** Add Gen200 Control (15 ml per 100 liter) to your water reservoir. Mix product well.

**Step 2.** Dissolve Rhodos Base according to the recommended mixing ratio found on the grow schedule, make sure powders are 100% dissolved before going to the next step.

Use warm water (20/ 25 °C) for faster dissolution.

**Step 3.** Dissolve Rhodos Grow/ Bloom according to the recommended mixing ratio.

Whether a Mixer or pump is used for mixing, always make sure powders are 100% dissolved before watering your plants.

**CHECK PH LEVEL** The pH-balance is crucial. Test and adjust your nutrient solution pH to the optimal range (Coco/rock wool pH vegetative: 5.5–5.8 Bloom: 5.8–6.2) or (Soil pH vegetative: 5.9–6.2 Bloom: 6.0–6.4) before watering you plants.

**APPLICATION METHOD** Water your plants directly from your water reservoir. In case of a feeding computer, refer to the Rhodos Stock Solutions applications schedule.

**FREQUENCY OF APPLICATION** Apply the Rhodos solution with every watering to ensure a constant supply of essential nutrients.

**SYSTEM COMPATIBILITY** Rhodos is formulated for use in all types of growing systems, including hydroponics, aeroponics, and soil/ Coco-based setups.
