

# Rhodos Grow

## Concentrated vegetative fertiliser

**EC Fertilizer**  
**3-10-25**

Focused on the vegetative stage of plant development, Rhodos Grow is engineered to propel lush and vigorous growth. This high-performance formula delivers an optimal blend of nitrogen, phosphorous, and potassium, along with essential trace elements that support increased biomass, leaf development, and photosynthetic capacity. Whether you're cultivating in or outdoors, Rhodos Grow ensures your plants have all the nutrients they need during the growth phase.

### Nutrient schedule

Dissolve in 100 L water	Clone	Vegetative	Bloom
Rhodos Grow	-	190 gr	-

The figures in the schedule represent the amount of grams of Rhodos Grow that should be added to **100 L of water** in the corresponding phase.

### Application instructions

**Water Quality** Starting with clean water, preferred to start with osmosis water. If using tap water, ensure the starting EC is below 0.4 mS/cm.

**Initial Mixing** Dissolve Rhodos Grow in water according to the recommended mixing ratio found on the grow schedule, after Rhodos Base is completely dissolved. Use warm water (20/25 °C) for faster dissolution. Whether a Mixer or pump is used for mixing, always make sure powders are 100% dissolved before feeding your plants.

**Check pH level** The pH-balance is crucial. Test and adjust your nutrient solution pH to the optimal range (Coco/rock wool pH vegetative: 5.5-5.8 Bloom: 5.8-6.2) or (Soil pH vegetative: 5.9-6.2 Bloom: 6.0-6.4) before watering you plants.

**Application Method** Water your plants directly from your water reservoir. In case of a feeding computer, refer to the Rhodos Stock Solutions applications schedule.

**Frequency of Application** Apply the Rhodos solution with every watering to ensure a constant supply of essential nutrients.

**System Compatibility** Rhodos is formulated for use in all types of growing systems, including hydroponics, aeroponics, and soil/ Coco-based setups.

**STORAGE** Store in original closed container. Store in a dry and cool place temp between 8-27 °C. Five-year shelf life from manufacturer date if stored properly.

**2,5 kg. 5 kg. 10 kg.**

Bulk packaging on request.
